

- Scale

- Illumination: Because of poor illumination, the zebra crossing may not be detected.

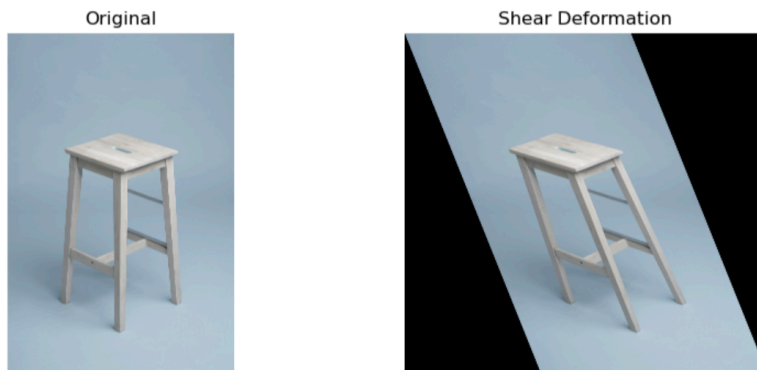

- Occlusion

Because of a person walking in front of 7-eleven, the shop door may not be recognized.

- Deformation

- Background clutter: The background is some wooden surface. The grains of the wood can create background noise.

- Viewpoint: If the focus of the viewpoint is changed, the background things will also be detected. May detect the cup or design depending on the viewpoint.
